SUBJECT INDEX TO VOLUME 20

- Abdomen**
 imaging routines, in Norwegian hospitals, 256-261
 systemic venous enhancement patterns, 103-111
Abdominal pain, lymphoma of large and small bowel,
 computed tomography, 21-25
Abstracts, 68-77, 147-155, 222-230, 286-294
Actinomyces, retroperitoneal, 133-136
Acute abdomen, lymphoma of large and small bowel, computed
 tomography, 21-25
Adrenal glands, primary lymphoma, magnetic resonance
 imaging, 126-128
Adrenocortical adenoma, calcified, aldosterone-producing,
 50-54
Adult respiratory distress syndrome (ARDS), idiopathic,
 radiography, 1-7
Aldosteronoma, benign, with calcifications, 50-54
Alpers' syndrome, magnetic resonance imaging, 235-237
Alveolar damage, diffuse radiography, 1-7
Alveus, FIRMS, 164-170
Anastomosis, carotid-basilar, 247-252
Aneurysms
 chronic dissecting, 262-268
 mycotic, computed tomography 26-30
 visceral vessel, 99-102
Angiomas, cerebral venous, with hemorrhagic lesions, 157-163
Angiomyolipoma, multifocal, with tuberous sclerosis, 99-102
Apoplexy, pineal, CT/MR imaging, 91-94
Appendicitis, right lower quadrant pain, 12-16
Artifact, CSF flow, 140-142
- Back pain, computed tomography, 143-146**
Barium
 studies, in Norwegian hospitals, 256-261
 tablet, esophageal stricture, 184-190
Behçet's disease, inflammatory pseudotumor of terminal ileum
 mimicking malignancy in, 191-193
Bladder mass, childhood, cystography, 64-67
Blood flow patterns, of true and false lumens in dissecting
 aneurysms, 262-268
Book Reviews, 231-232, 295-296
Brain abnormalities
 magnetic resonance imaging, 235-237
 vein of Galen malformation, 243-246
Brain tumor, multiple sclerosis simulating, MRI of, 171-177
Bronchogenic cyst, primary pulmonary chondrosarcoma
 mimicking, 181-183
- Calcifications, adrenal, 50-54**
Cancer
 cecal, sonographic differential diagnosis, 12-16
 cervical, 194-198
 endometrial, 194-198
 gallbladder, ultrasonography, 269-272
- hepatocellular, 199-203
 inflammatory pseudotumor of terminal ileum mimicking, in
 Behçet's disease, 191-193
 intramedullary spinal cord metastases, 238-242
 low-grade osteosarcoma, 282-285
 malignant vaginal melanoma, 137-139
 renal cell, metastatic to ovary, 42-44
 thyroid, 31-36
 uterine, 194-198
Carcinoid tumor, occluding endobrachial, acquired intralobar
 bronchopulmonary sequestration secondary to, 178-180
Carotid-basilar anastomosis, persistent trigeminal artery,
 247-252
Cavitary nodular lesions, benign leiomyomas metastasizing as,
 45-49
Cecal carcinoma, right lower quadrant pain, sonographic
 differential diagnosis, 12-16
Cerebellopontine angle tumor, magnetic resonance imaging,
 85-90
Cerebral cortex, FIRMS, 164-170
Cervical cancer, in peri/postmenopausal women, computed
 tomography, 194-198
Chemical shift, malignant vaginal melanoma, 137-139
Chest radiography, occult esophageal narrowing with barium
 tablet detected during, 184-190
Children
 Alpers' syndrome, magnetic resonance imaging, 235-237
 bladder mass, cystography, 64-67
 vertebral osteoblastoma, 37-41
Cholangiography, biliary tree necrosis, transplanted liver, 8-11
Cholecystitis, ultrasonography, 269-272
Cholelithiasis, ultrasonography, 269-272
Chondrosarcoma, primary pulmonary, mimicking bronchogenic
 cyst, 181-183
Chorioid plexus papilloma, atypical, magnetic resonance
 imaging, 85-90
Chronic dissecting aneurysms, MR phase-contrast techniques,
 262-268
Colitis, right lower quadrant pain, sonographic differential
 diagnosis, 12-16
Color Doppler flow imaging, of hepatocellular carcinomas,
 199-203
Color hues, three-step grading for, color Doppler flow imaging
 of hepatocellular carcinomas, 199-203
Computed tomography (CT)
 acute abdomen, lymphoma of large and small bowel, 21-25
 aorta, *Salmonella*-related mycotic aneurysm of 26-30
 back pain, 143-146
 benign metastasizing leiomyoma, 45-49
 dynamic abdominal, systemic venous enhancement patterns
 during, 103-111
 head and neck mediastinum, 31-36
 intrauterine low density in peri/postmenopausal women,
 194-198

- monostotic fibrous dysplasia, 143-146
 multiple sclerosis simulating brain tumor, 171-177
 omental caking in Hodgkin's disease, 253-255
 pineal gland apoplexy, 91-94
 primary pulmonary chondrosarcoma mimicking bronchogenic cyst, 181-183
 primitive mucinous cystadenocarcinoma of retroperitoneum, 129-132
 renal cell carcinoma metastatic to ovary, 42-44
 retroperitoneal granular cell tumor, 279-281
 septic thrombophlebitis of inferior mesenteric vein associated with diverticulitis, 115-117
 spiral, with three-dimensional reconstruction, 8-11
 stellate pattern, retroperitoneal actinomycosis with intraperitoneal spread, 133-136
 vertebral osteoblastoma, 37-41
- Contrast medium**
 cervical and mediastinal CT, 31-36
 dynamic abdominal computed tomography, 103-111
 hepatic tumors, 118-125
- Cricopharyngeus**, Zenker's diverticulum, 112-114
- Cystadenocarcinoma**, primitive mucinous, retroperitoneal, 129-132
- Cystography**, bladder mass, 64-67
- Cysts**
 bronchogenic, primary pulmonary chondrosarcoma mimicking, 181-183
 hemorrhagic pineal, CT/MR imaging, 91-94
- Diagnostic radiology**, acute abdomen, lymphoma of large and small bowel, 21-25
- Differential diagnosis**, sonographic, 12-16
- Differentiation**, hepatic tumor, 118-125
- Diffuse alveolar damage**, ARDS, radiography, 1-7
- Digital clubbing**, pachydermoperiostosis, magnetic resonance imaging, 212-218
- Diverticulitis**
 sigmoid, 115-117
 Zenker's, 112-114
- Doppler flow imaging**, color, of hepatocellular carcinomas, 199-203
- Dural malformation**, spontaneous pulsatile tinnitus secondary to, 95-98
- Dynamic computed tomography**, abdominal, systemic venous enhancement patterns during, 103-111
- Embryology**, anomalous inferior vena cava associated with horseshoe kidneys, 276-278
- Endometrial cancer**, in peri/postmenopausal women, computed tomography, 194-198
- Endometrial polyps**, in peri/postmenopausal women, computed tomography, 194-198
- Endoscopy**, in Norwegian hospitals, 256-261
- Enhancement patterns**, venous, 103-111
- Enthesopathy**, skeletal, 212-218
- Esophagus**
 imaging routines, in Norwegian hospitals, 256-261
 occult stricture, radiography, 184-190
 outpouching, Zenker's diverticulum, 112-114
- Extraventricular neoplasm**, magnetic resonance imaging, 85-90
- Fast inversion recovery** for myelin suppression (FIRMS), MRI pulse sequence for highlighting cerebral gray matter, 164-170
- Fast-spin-echo magnetic resonance imaging**, CSF flow artifact, 140-142
- Fat-saturation magnetic resonance imaging**, malignant vaginal melanoma, 137-139
- Fibrous dysplasia**, low-grade osteosarcoma of metacarpal bone, radiography, 282-285
- Flat-film studies**, in Norwegian hospitals, 256-261
- Flexor digitorum superficialis**, muscular, wrist, 219-221
- Flow patterns**, of true and false lumens, in dissecting aneurysms, 262-268
- Follow-up**, computed tomography, of retroperitoneal granular cell tumor, 279-281
- Forearm**, anomalous muscles about volar aspect of, 219-221
- Gadolinium-DOTA-enhanced MR imaging**, hepatic tumor differentiation, 118-125
- Gallbladder diseases**, ultrasonography, 269-272
- Gastrointestinal imaging**, in Norwegian hospitals, 256-261
- Gestational trophoblastic disease**, magnetic resonance imaging, 60-63
- Granular cell tumor**, retroperitoneal, computed tomography, 279-281
- Gray matter**, cerebral, FIRMS for highlighting, 164-170
- Hemangiomas**, and color Doppler flow imaging of hepatocellular carcinomas, 199-203
- Hemorrhage**
 cerebral venous angiomas associated with, magnetic resonance imaging, 157-163
 cystic, pineal gland apoplexy, 91-94
- Hepatocellular carcinoma (HCC)**, color Doppler flow imaging, 199-203
- Hippocampus**, FIRMS, 164-170
- Histopathology**, idiopathic adult respiratory distress syndrome, diffuse alveolar damage, 1-7
- Hodgkin's disease**, omental caking in, computed tomography, 253-255
- Horseshoe kidneys**, with anomalous inferior vena cava, 276-278
- Ileum**, terminal, inflammatory pseudotumor of, 191-193
- Infants**, kaposiform retroperitoneal hemangioendothelioma, 17-20
- Inflammatory pseudotumor**, terminal ileal, mimicking Behçet's disease, 191-193
- Interstitial lung disease**, benign leiomyomas metastasizing as, 45-49
- Intradural pathology**, fast-spin-echo MRI of spine simulating, 140-142
- Intralobar bronchopulmonary sequestration**, acquired secondary to occluding endobrachial carcinoid tumor, 178-180
- Intraperitoneal spread**, retroperitoneal actinomycosis, 133-136
- Intrauterine low density**, in peri/postmenopausal women, computed tomography, 194-198
- In utero imaging**, kaposiform retroperitoneal hemangioendothelioma, 17-20
- Inversion recovery**, fast, for myelin suppression, 164-170
- Kaposi's sarcoma**, and retroperitoneal hemangioendothelioma, with Kasabach-Merritt syndrome, 17-20
- Kasabach-Merritt syndrome**, congenital kaposiform retroperitoneal hemangioendothelioma with, 17-20
- Kidneys**

- angiomyolipomas in, 99-102
 horseshoe, with anomalous inferior vena cava, 276-278
 Knee, suprapatellar plicae of, soft-tissue mass, 55-59
- Large intestine, lymphoma, computed tomography, 21-25
 Leiomyosarcoma, liver primary, magnetic resonance imaging, 273-275
- Liver
 Alpers' syndrome, magnetic resonance imaging, 235-237
 angiomyolipomas in, 99-102
 cancer, color Doppler flow imaging, 199-203
 primary leiomyosarcoma, magnetic resonance imaging, 273-275
 scintigraphy, in Norwegian hospitals, 256-261
 transplant, biliary tree necrosis, 8-11
 tumors, gadolinium-DOTA-enhanced MRI, 118-125
 Lumens, true and false, blood flow pattern evaluation, 262-268
 Lung disease, interstitial, 45-49
 Lymph nodes, angiomyolipomas in, 99-102
 Lymphoma
 of large and small bowel, computed tomography, 21-25
 omental caking in Hodgkin's disease, computed tomography, 253-255
 primary adrenal glands, 126-128
- Magnetic resonance angiography (MRA)
 magnetic resonance, persistent trigeminal artery and its variant, 247-252
 spinal, arteriovenous malformations, 79-84
 spontaneous pulsatile tinnitus secondary to dural malformation, 95-98
 vein of Galen malformation, 243-246
- Magnetic resonance imaging (MRI)
 Alpers' syndrome, 235-237
 anomalous muscles about volar aspect of wrist and forearm, 219-221
 atypical choroid plexus papillomas, 85-90
 cerebral venous angiomas associated with hemorrhagic lesions, 157-163
 disk of temporomandibular joint, 204-211
 fast-spin-echo, CSF flow artifact, 140-142
 fat-saturation, malignant vaginal melanoma, 137-139
 gadolinium-DOTA-enhanced, hepatic tumor differentiation, 118-125
 intramedullary spinal cord metastasis, 238-242
 multiple sclerosis simulating brain tumor, 171-177
 pachydermoperiostosis, 212-218
 persistent trigeminal artery and its variant, 247-252
 pineal gland apoplexy, 91-94
 placental site gestational trophoblastic neoplasm, 60-63
 primary adrenal lymphoma, 126-128
 primary leiomyosarcoma of liver, 273-275
 primary pulmonary chondrosarcoma mimicking bronchogenic cyst, 181-183
 pulse sequence, FIRMS, 164-170
 spinal arteriovenous malformations, 79-84
 vertebral osteoblastoma, 37-41
- Magnetic resonance phase-contrast technique, chronic dissecting aneurysms, 262-268
 Magnetic resonance venography, vein of Galen malformation, 243-246
 Malformation, cerebral vascular, magnetic resonance imaging, 157-163
- Malignant melanoma, vaginal, 137-139
 Mass lesion, multiple sclerosis presenting as, 171-177
 Mediastinum, computed tomography, 31-36
 Melanoma, malignant, vaginal, 137-139
 Mesenteric vein, inferior, septic thrombophlebitis of, 115-117
 Metacarpal bones, low-grade osteosarcoma of, radiography, 282-285
 Metastasis
 leiomyoma, benign, 45-49
 renal cell carcinoma, to ovary, 42-44
 spinal cord, intramedullary, 238-242
 tumor, and color Doppler flow imaging of hepatocellular carcinomas, 199-203
- Migration disorders, FIRMS, 164-170
 Monostotic fibrous dysplasia, computed tomography, 143-146
 Multiple sclerosis, simulating brain tumor, MRI of, 171-177
 Muscles, anomalous, magnetic resonance imaging, 219-221
 Mycotic aneurysm, *Salmonella*-related, of aorta 26-30
 Myelin suppression, fast inversion recovery for, 164-170
- Narrowing, esophageal, 184-190
 Neck, upper, computed tomography, 31-36
 Necrosis, biliary tree, transplanted liver, 8-11
- Neoplasms
 aldosterone-secreting, 50-54
 extraventricular, magnetic resonance imaging, 85-90
 gestational trophoblastic, 60-63
 head and neck, 31-36
 hepatic, gadolinium-DOTA-enhanced MRI, 118-125
 omental caking in Hodgkin, 253-255
 primary, 37-41
 primary leiomyosarcoma of liver, 273-275
 renal cell carcinoma metastatic to ovary, 42-44
 spinal cord, 238-242
 vaginal, 137-139
- Neuronal degeneration, Alpers' syndrome, magnetic resonance imaging, 235-237
 Neuropathy, wrist and forearm muscle, magnetic resonance imaging, 219-221
 Non-Hodgkin's B-cell lymphoma, adrenal gland involvement, magnetic resonance imaging, 126-128
 Norwegian hospitals, imaging routines in, 256-261
 Note of Thanks, 297-298
- Occult lesions, esophageal, 184-190
 Omental caking, in Hodgkin's disease, computed tomography, 253-255
 Osteosarcoma, low-grade, metacarpal bone, 282-285
- Ovary
 renal cell carcinoma metastatic to, 42-44
 torsion, right lower quadrant pain, sonographic differential diagnosis, 12-16
 tumors, primitive mucinous cystadenocarcinoma of retroperitoneum, 129-132
- Pachydermoperiostosis, magnetic resonance imaging, 212-218
 Papillomas, atypical choroid plexus, magnetic resonance imaging, 85-90
 Pathology, intradural, fast-spin-echo MRI of spine simulating, 140-142
 Pathology-radiology correlations, idiopathic adult respiratory distress syndrome, diffuse alveolar damage, 1-7

- Periostitis, pachydermoperiostosis, magnetic resonance imaging, 212-218
- Peri/postmenopausal women, intrauterine low density in, computed tomography, 194-198
- Peritoneum, retroperitoneal actinomycosis, 133-136
- Persistent trigeminal artery, MR imaging and MR angiography, 247-252
- Pharyngeal space, posterior, Zenker's diverticulum, 112-114
- Phase-contrast technique, magnetic resonance, chronic dissecting aneurysms, 262-268
- Pineal gland, apoplexy, CT/MR imaging, 91-94
- Placental site trophoblastic tumors, magnetic resonance imaging, 60-63
- Plicae, suprapatellar, soft-tissue mass, 55-59
- Pneumoperitoneum, lymphoma, computed tomography, 21-25
- Polyps
 endometrial, in peri/postmenopausal women, 194-198
 gallbladder, ultrasonography, 269-272
- Progressive cerebral poliodystrophy, Alpers' syndrome, magnetic resonance imaging, 235-237
- Pseudotumor, inflammatory, terminal ileal, 191-193
- Pulmonary chondrosarcoma, primary, mimicking bronchogenic cyst, 181-183
- Pulsatile flow, CSF, 140-142
- Radiography
 idiopathic adult respiratory distress syndrome, diffuse alveolar damage, 1-7
 low-grade osteosarcoma of metacarpal bone, 282-285
- Radiology, diagnostic, lymphoma of large and small bowel, 21-25
- Rapid imaging, hepatic tumor differentiation, 118-125
- Retroperitoneum
 granular cell tumor, computed tomography, 279-281
 primitive mucinous cystadenocarcinoma of, 129-132
- Right lower quadrant pain, sonographic differential diagnosis, 12-16
- Scintigraphy, liver, in Norwegian hospitals, 256-261
- Sclerosis, hippocampal, FIRMS, 164-170
- Septa, enhancing, bilateral adrenal tumors, 126-128
- Septic thrombophlebitis, of inferior mesenteric vein, diverticulitis with, 115-117
- Sigmoid diverticulitis, septic thrombophlebitis, inferior mesenteric vein and, 115-117
- Skeletal enthesopathy, pachydermoperiostosis, magnetic resonance imaging, 212-218
- Small intestine
 imaging routines, in Norwegian hospitals, 256-261
 lymphoma, computed tomography, 21-25
- Soft-tissue mass, suprapatellar bursa, 55-59
- Spine
 angiography, arteriovenous malformations, 79-84
 fast-spin-echo MRI, CSF flow artifact, 140-142
 intramedullary metastasis, magnetic resonance imaging, 238-242
 vertebral osteoblastoma, benign, 37-41
- Spiral computed tomography, with three-dimensional reconstruction, liver transplant, 8-11
- Stellate pattern, on CT, retroperitoneal actinomycosis with intraperitoneal spread, 133-136
- Subarachnoid space, spinal, fast-spin-echo MRI, 140-142
- Suprapatellar bursa, soft-tissue mass, 55-59
- Tamoxifen therapy, benign metastasizing leiomyoma/, 45-49
- Temperomandibular joint (TMJ), disk, magnetic resonance imaging, 204-211
- Terminal ileum, inflammatory pseudotumor of, 191-193
- Three-dimensional reconstruction, spiral CT with, biliary tree necrosis, 8-11
- Thrombophlebitis, septic, of inferior mesenteric vein, 115-117
- Thrombosis, systems venous enhancement patterns, 103-111
- Thyroid neoplasms, contrast-enhanced computed tomography, 31-36
- Tinnitus, pulsatile, secondary to dural malformation, 95
- Torsion, ovarian, sonographic differential diagnosis, 12-16
- Tracheal narrowing, Zenker's diverticulum, 112-114
- Transplantation, liver, biliary tree necrosis, 8-11
- Trigeminal artery, persistent, 247-252
- Trophoblastic tumors, placental site, magnetic resonance imaging, 60-63
- Tuberous sclerosis, multifocal angiomyolipoma with, 99-102
- Tumors
 brain, MRI of multiple sclerosis simulating, 171-177
 carcinoid, 178-180
 cerebellopontine angle, 85-90
 hepatic, gadolinium-DOTA-enhanced MR imaging, 118-125
 metastasis, and color Doppler flow imaging of hepatocellular carcinomas, 199-203
 primary leiomyosarcoma of liver, 273-275
 retroperitoneal granular cell, 279-281
- Ultrasonography
 Doppler color, of hepatocellular carcinomas, 199-203
 gallbladder diseases, 269-272
 primitive mucinous cystadenocarcinoma of retroperitoneum, 129-132
 renal cell carcinoma metastatic to ovary, 42-44
- Ureter, retroperitoneal actinomycosis with intraperitoneal spread, 133-136
- Uterine leiomyoma, benign, metastatic, 45-49
- Vagina, malignant melanoma, fat-saturation MRI, 137-139
- Variant, persistent trigeminal artery, 247-252
- Vein of Galen, malformation, magnetic resonance angiography, 243-246
- Veins, systemic, enhancement patterns, 103-111
- Vena cava, anomalous inferior, with horseshoe kidneys, 276-278
- Venography, magnetic resonance, Galen malformation, 243-246
- Venous angiomas, cerebral, with hemorrhagic lesions, 157-163
- Vertebral osteoblastoma, benign, CT and MRI, 37-41
- Volar aspect, of wrist and forearm, muscle anomalies, 219-221
- White matter, FIRMS, 164-170
- Wrist, anomalous muscles about volar aspect of, 219-221
- Zenker's diverticulum, unusual presentation, 112-114
